Antec®

Who We Are

- Founded 1986 in the heart of San Francisco's Silicon Valley

- Global Market leader in high performance computer components

- Industry thought leader

- Innovation Pioneer

Antec®

Where We Are

Headquartered in Fremont, California has main offices in Taiwan, the Netherlands and Berlin, Germany and remote locations in many others. Our products are distributed to over 84 countries

Antec®

The Antec Commitment

Value

Getting More

Antec's commitment to value guides each of our designs, from concept to production

Innovation

Better Solutions

For Antec, innovation starts with asking the right questions

Perfection

Ideas into Practice

Everything starts with a great idea, but perfection requires expert execution

What Makes Our Cases Special?

Expandability:

Antec cases offer full expandability options making future upgrades a breeze

Features:

Antec cases have the features that gamers, enthusiasts and system intregrators demand: removable filters, hot-swap bays, all-black interiors, quick-release drive bays and cable management paths

Quiet Computing™:

Antec's QC technology includes innovative two-layer , steel and polycarbonate, side panels, triple-layer sound dampening front panels, silicone grommets and feet as well as dedicated PSU compartments

Sturdy cases:

Antec is known for producing PC cases that can take a beating. This not only means Antec PC cases last a long time, but they also keep delicate components safe from harm

Antec®

Market Segmentation

Antec

The world's most reliable Power Supply Units

Research and Development

Our state-of-the-art R&D lab in Taipei, Taiwan is the cornerstone of Antec’s superior power supplies

Manufacturing Facilities

Antec employs some of the most advanced power supply manufacturing facilities in the world, allowing Antec to proudly claim the lowest returns rates in the industry

Antec

Continuous Power

Full power all the time. This means that an Antec PSU delivers its stated Wattage, consistently, all the time, every time. Not all PSU can say this

80 PLUS Standard

Efficiency is a must. All Antec power supplies are 80Pluss Certified at a minimum, increasing efficiency and reducing consumption

Reliability

Products you can believe in. In addition to extended warranties, Antec's PSUs have the lowest returns in the industry
